CONTRACTOR SAFETY MANAGEMENT SYSTEM (CSMS) AWARENESS TRAINING

LATAR BELAKANG

- Kontraktor sekarang ini merupakan salah satu unsur yang penting dalam perusahaan sebagai mitra yang membantu kegiatan operasi perusahaan.
- Misalkan :
  - Kontraktor Konstruksi
  - Kontraktor Jasa
  - Kontraktor Operasi

LATAR BELAKANG

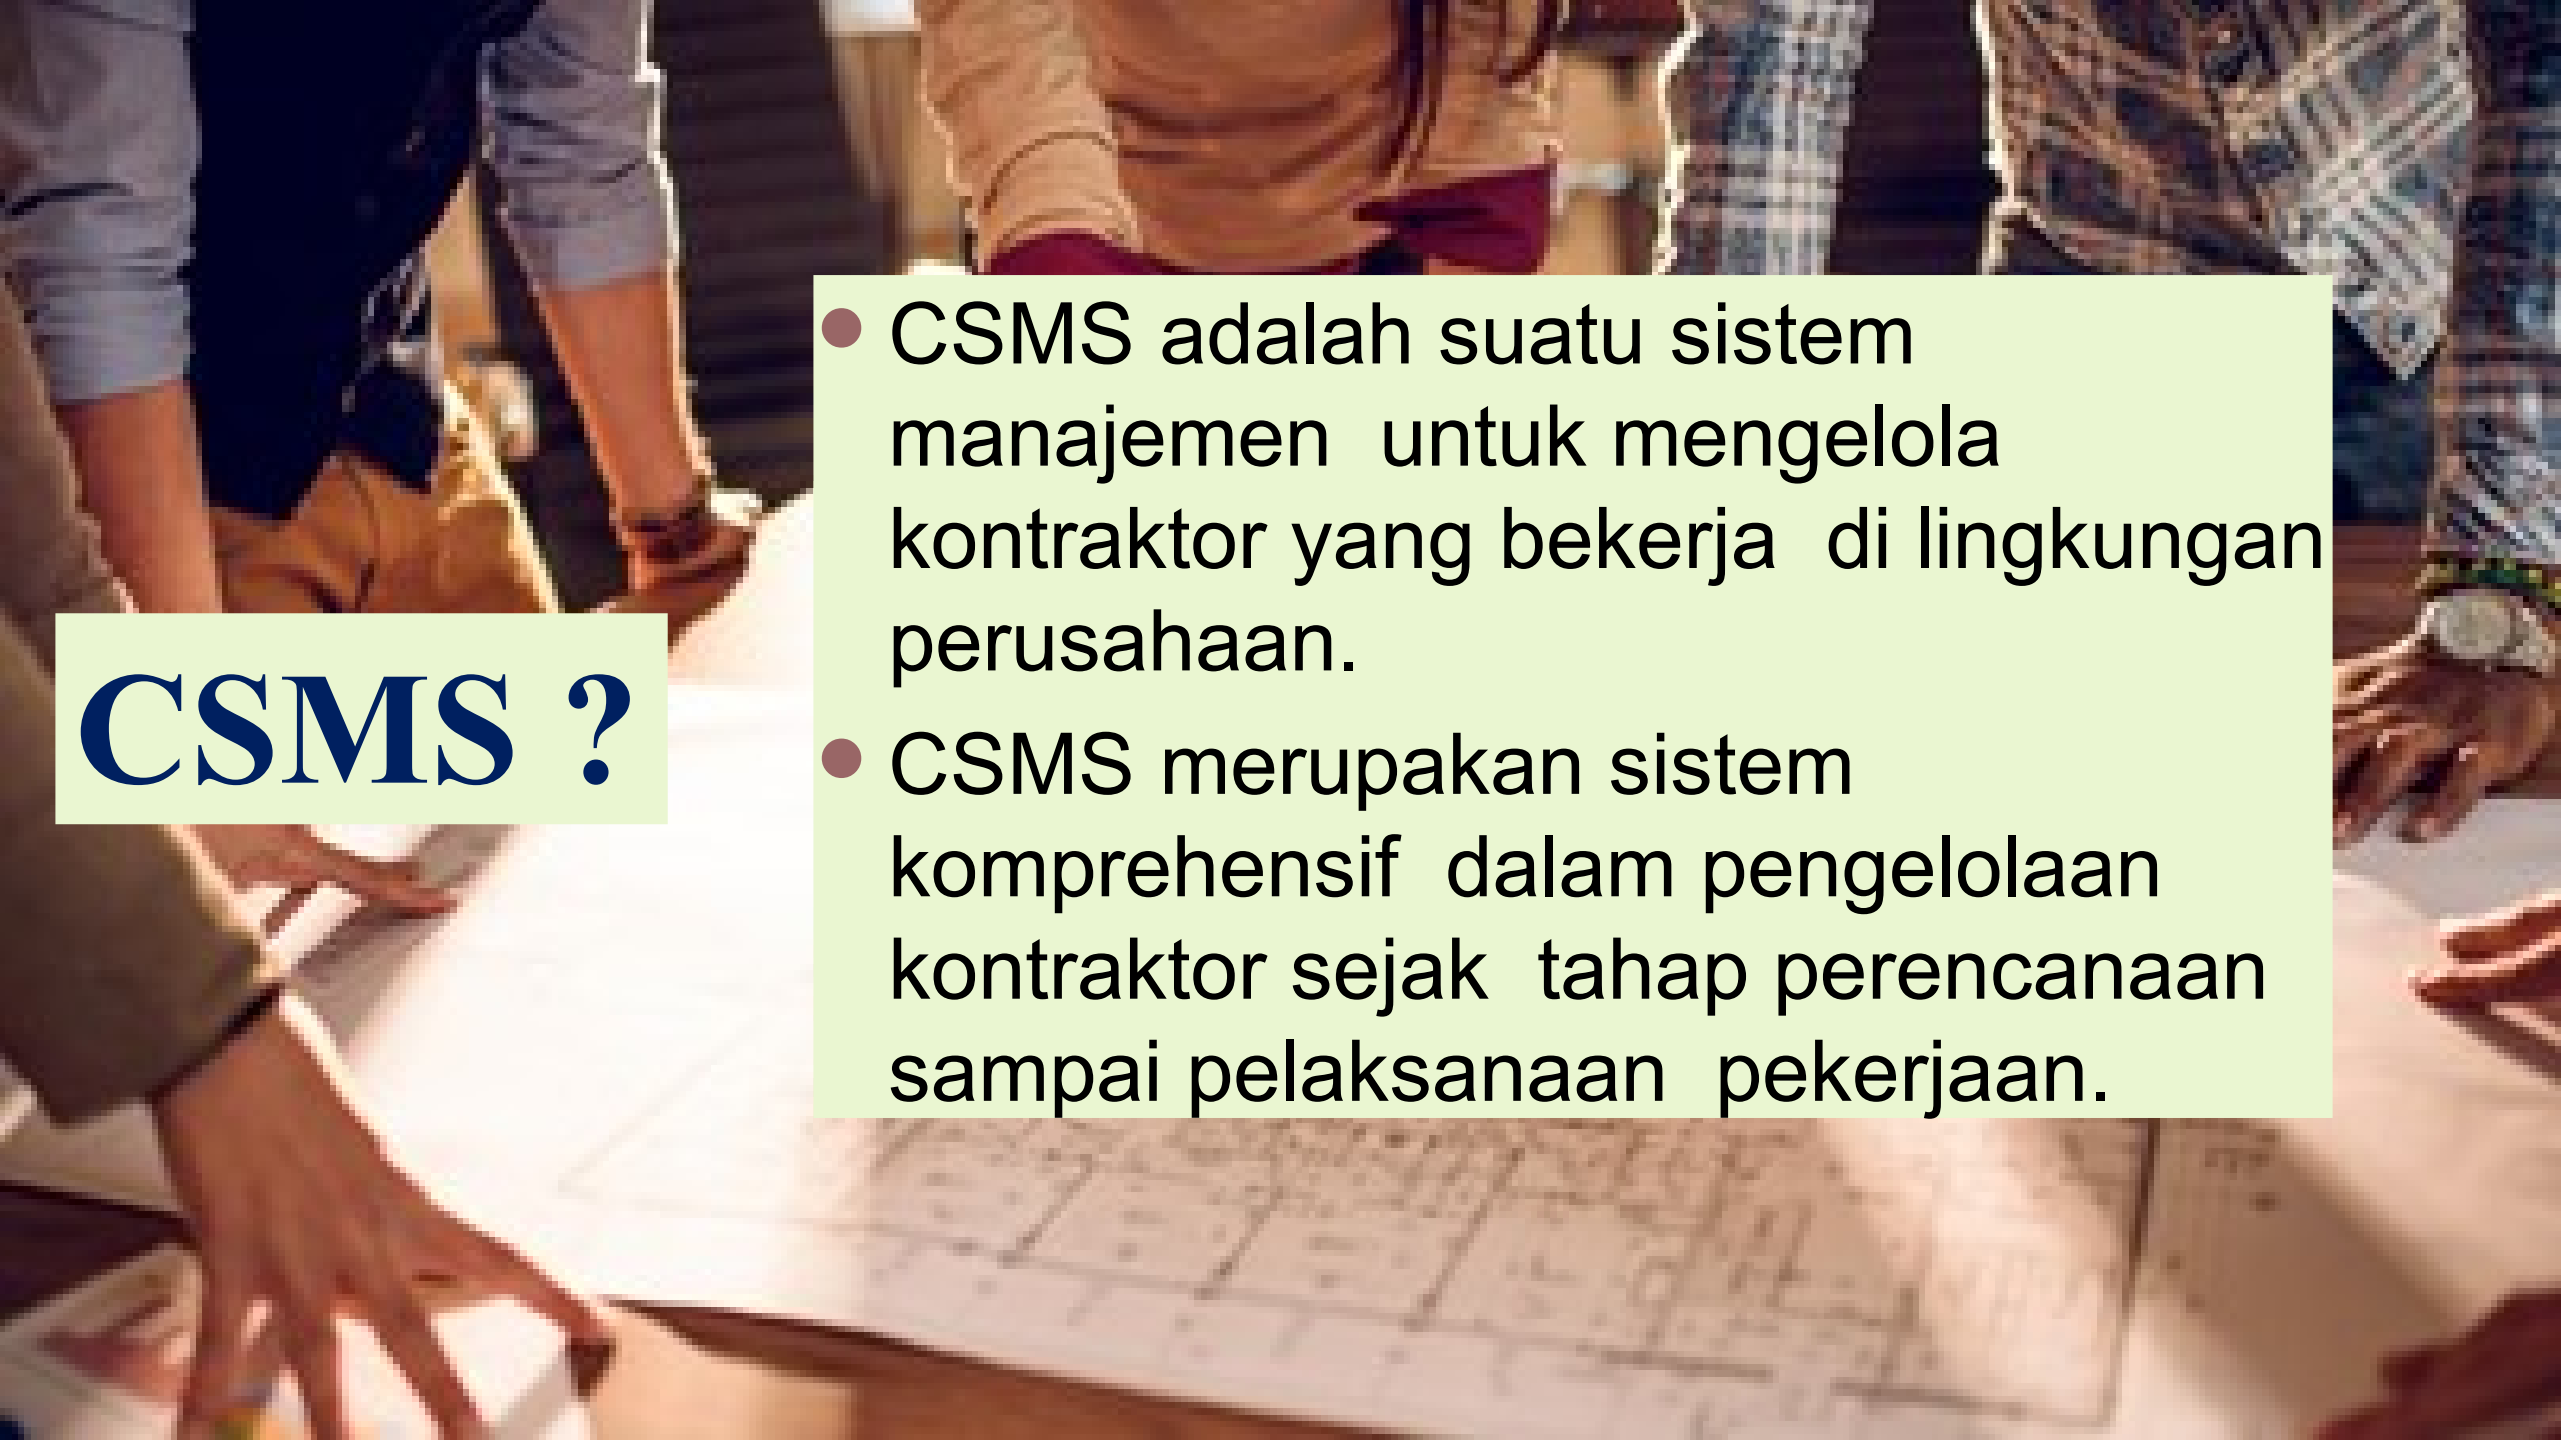

- Meningkatnya angka kecelakaan khususnya keterlibatan kontraktor.
- Tingginya biaya akibat kecelakaan dan hilangnya jam kerja.
- Dampak negatif terhadap pekerja, fasilitas dan lingkungan pihak penyelenggara.
- Kelalaian yang dilakukan kontraktor dapat menimbulkan bahaya bagi operasi perusahaan dan menimbulkan kecelakaan yang mempengaruhi kinerja K3 perusahaan.
- Berdampak terhadap reputasi perusahaan.
- Adanya peraturan pemerintah

LATAR BELAKANG

- **Kontraktor rawan terhadap kecelakaan dalam menjalankan kegiatannya.**
  - **Tenaga Kontraktor bersifat sementara.**
  - **Pekerja kasar dan pendidikan lebih rendah**
  - **Tingkat disiplin dalam bekerja kurang.**
  - **Pemahaman tentang peraturan K3 perusahaan rendah.**
  - **Terlibat langsung dalam pelaksanaan pekerjaan sehingga lebih banyak terpapar bahaya.**

LATAR BELAKANG

- **Kegiatan Kontraktor harus dikelola dengan baik untuk menjamin keselamatan dalam setiap kegiatan kerja kontraktor.**
- **Pada dasarnya Perusahaan berharap hasil pekerjaan kontraktor:**
  - **No defect**
  - **No rework**
  - **No harm to people**
  - **No damage to equipment**
  - **No damage to environment**
- **Pengelolaan Kontraktor melalui Contractor Safety Management System (CSMS).**

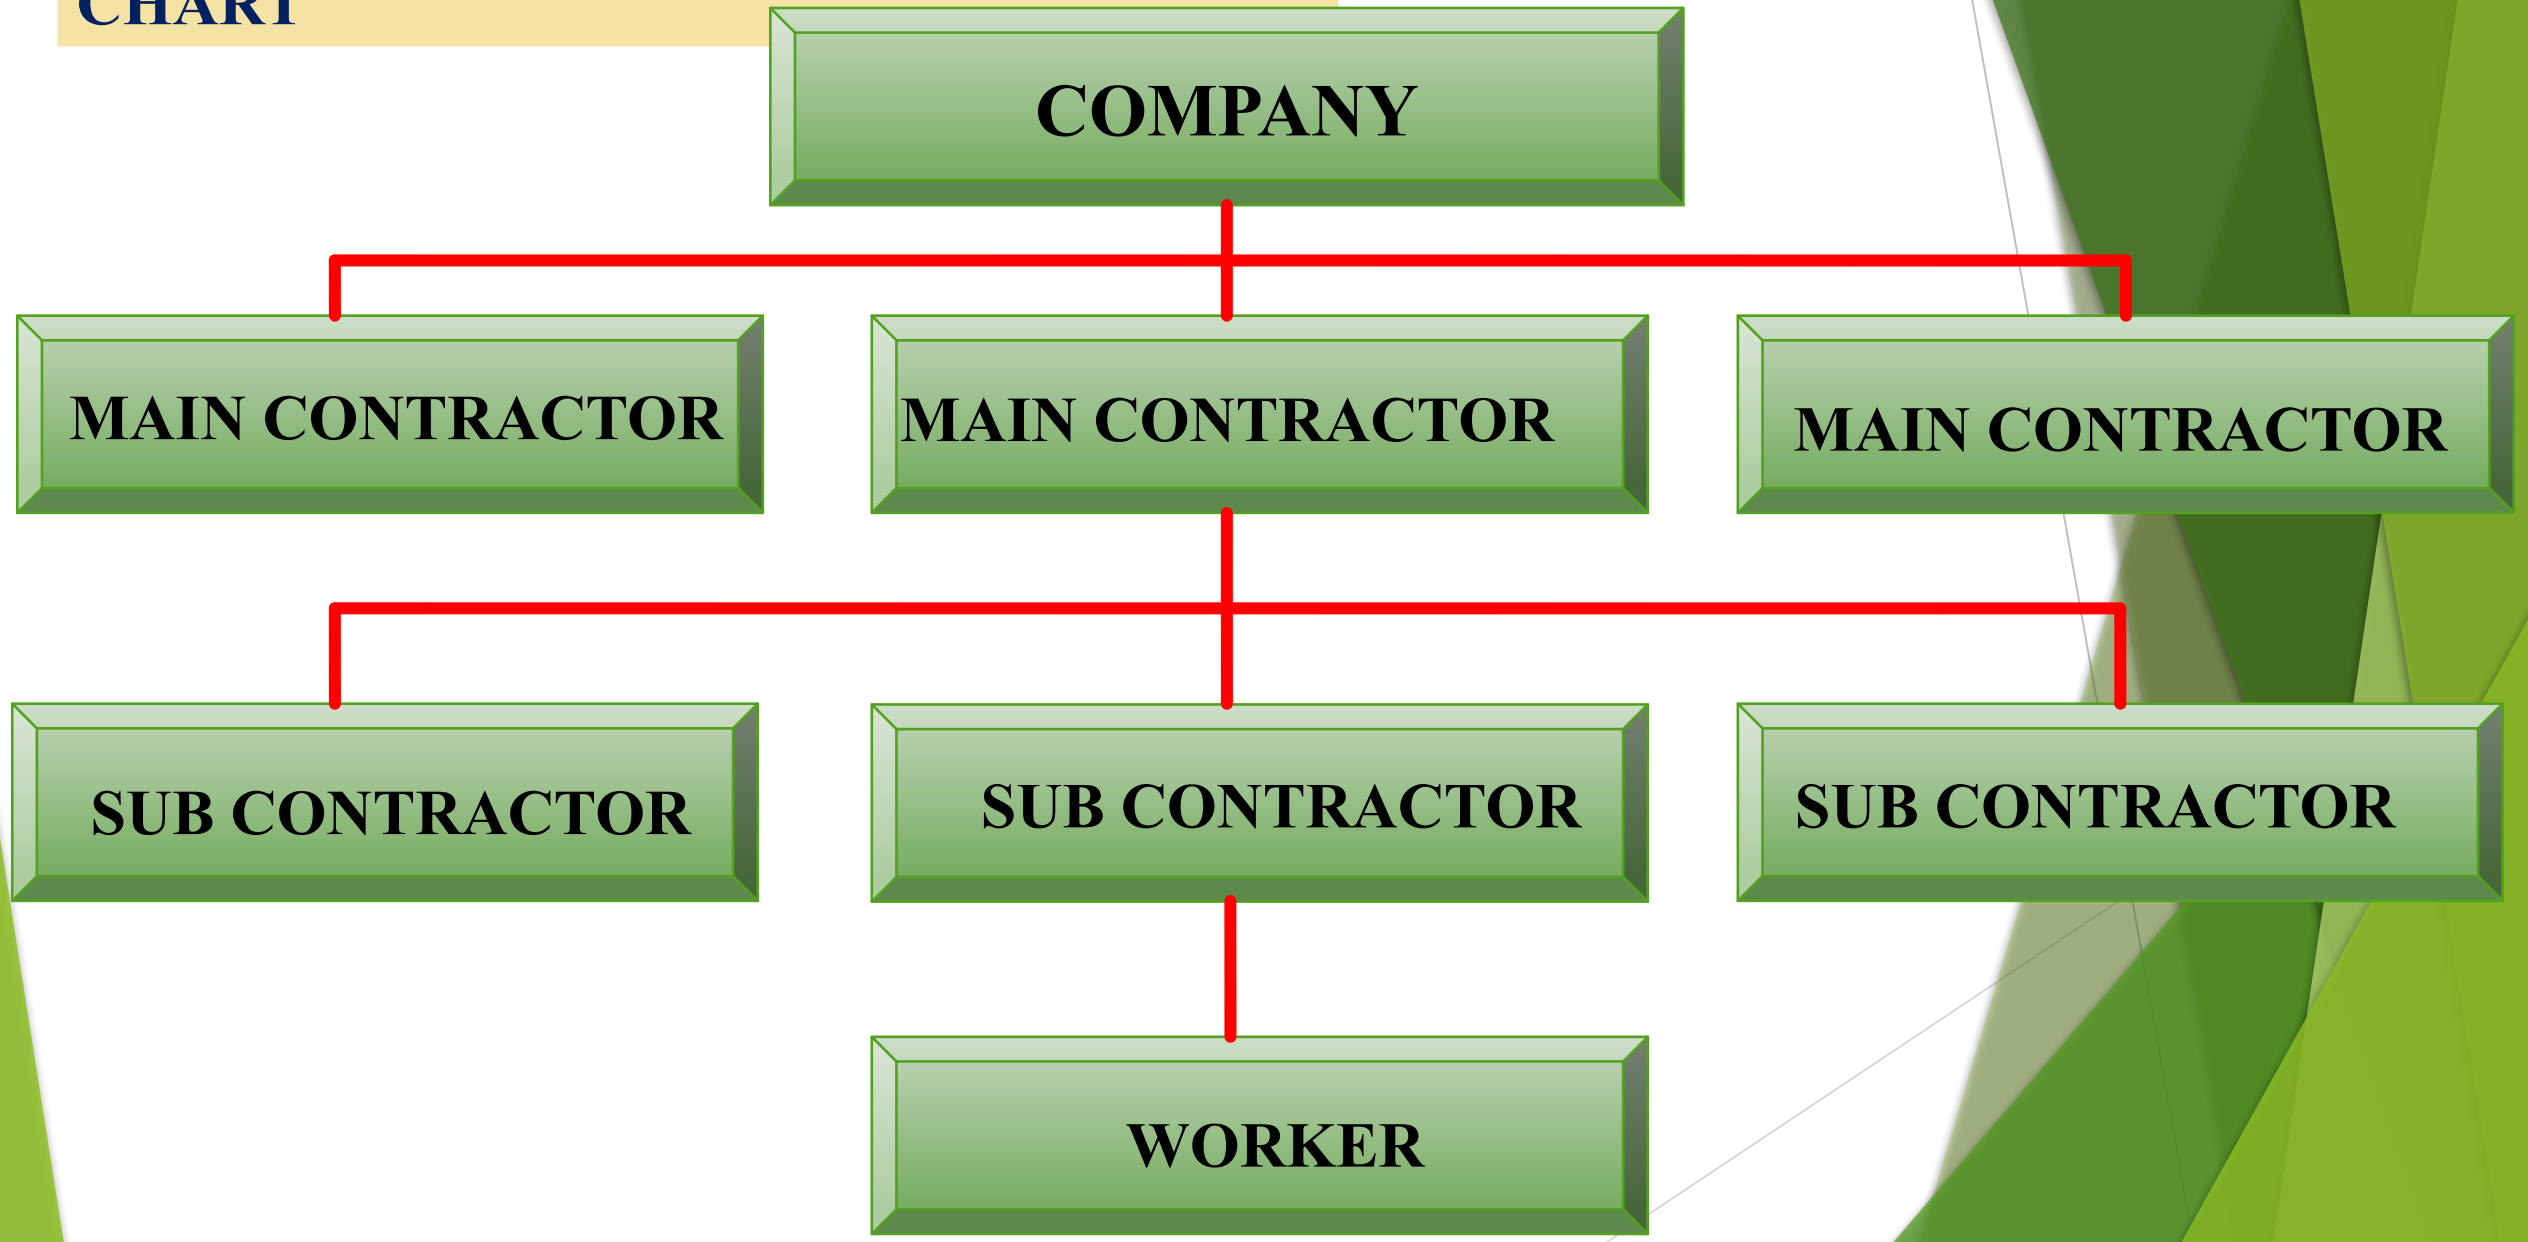

CSMS ?

- CSMS adalah suatu sistem manajemen untuk mengelola kontraktor yang bekerja di lingkungan perusahaan.
- CSMS merupakan sistem komprehensif dalam pengelolaan kontraktor sejak tahap perencanaan sampai pelaksanaan pekerjaan.

Referensi

- **PP RI No 50 Tahun 2012 tentang SMK3** pasal 11 ayat 1 huruf c - mengenai Pelaksanaan Rencana K3, dimana kegiatan dalam pelaksanaan rencana K3 paling sedikit meliputi *Tindakan Pengendalian, Perancangan & Rekayasa, Prosedur dan Instruksi Kerja, Penyerahan sebagian pelaksanaan Pekerjaan, Pembelian/Pengadaan barang dan Jasa.*
- **Pedoman Tata Kerja SKK Migas No PTK-005/SKKMA0000/2018/S0**, tentang *Pengelolaan K3 dan LL di Kegiatan Usaha Hulu Minyak dan Gas Bumi*.
- **OSHA 29 CFR 1910.119** yang mengatur mengenai Process Safety Management of Highly Hazardous Chemicals juga menyebutkan pada elemen keenam mengenai Contractor Obligation. Di dalamnya disebutkan *kewajiban kontraktor sebelum menjadi rekanan perusahaan, termasuk mengenai pemenuhan dokumen-dokumen terkait rencana pelaksanaan pekerjaan.*

CSMS – MENJEMBATANI OHSMS PERUSAHAAN DENGAN OHSMS KONTRAKTOR

MANFAAT CSMS

- **CSMS menjembatani OHSMS Perusahaan dengan OHSMS kontraktor, Perusahaan memberikan persyaratan yang harus dipenuhi oleh OHSMS Kontraktor.**
- **Untuk itu, perusahaan harus memiliki OHSMS yang baik, sehingga dapat memberikan kerangka dasar bagi pengembangan OHSMS Kontraktor.**

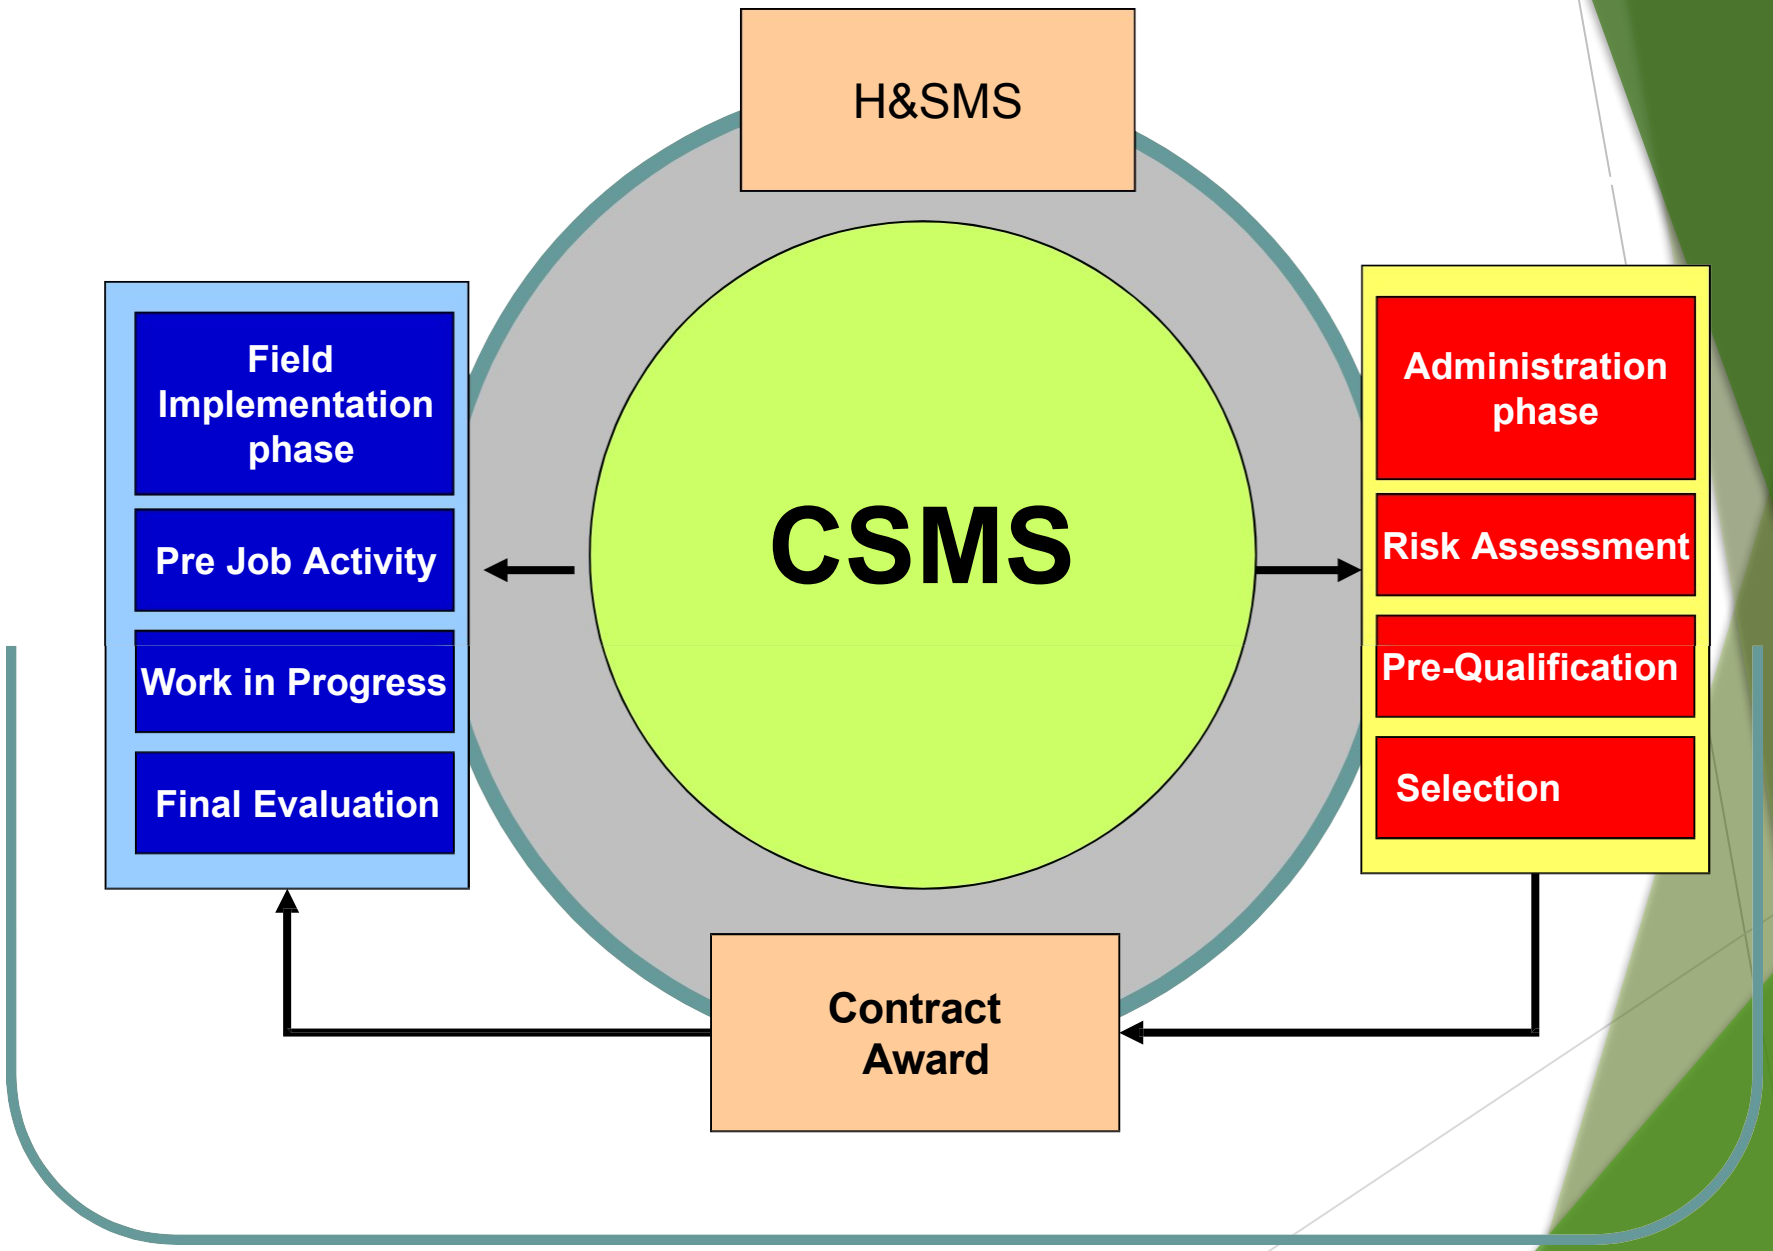

TUJUAN CSMS

- Untuk meyakinkan bahwa kontraktor yang bekerja dilingkungan perusahaan telah memenuhi standar dan kriteria K3 yang ditetapkan perusahaan.
- Sebagai alat untuk menjaga dan meningkatkan kinerja Keselamatan di lingkungan kontraktor.
- Untuk mencegah dan menghindarkan kerugian yang timbul akibat aktivitas kerja kontraktor.

STRUKTUR CSMS

Tahap Administrasi

1. Risk Assessment
2. Pre Qualification/Prakualifikasi
3. Selection/Seleksi

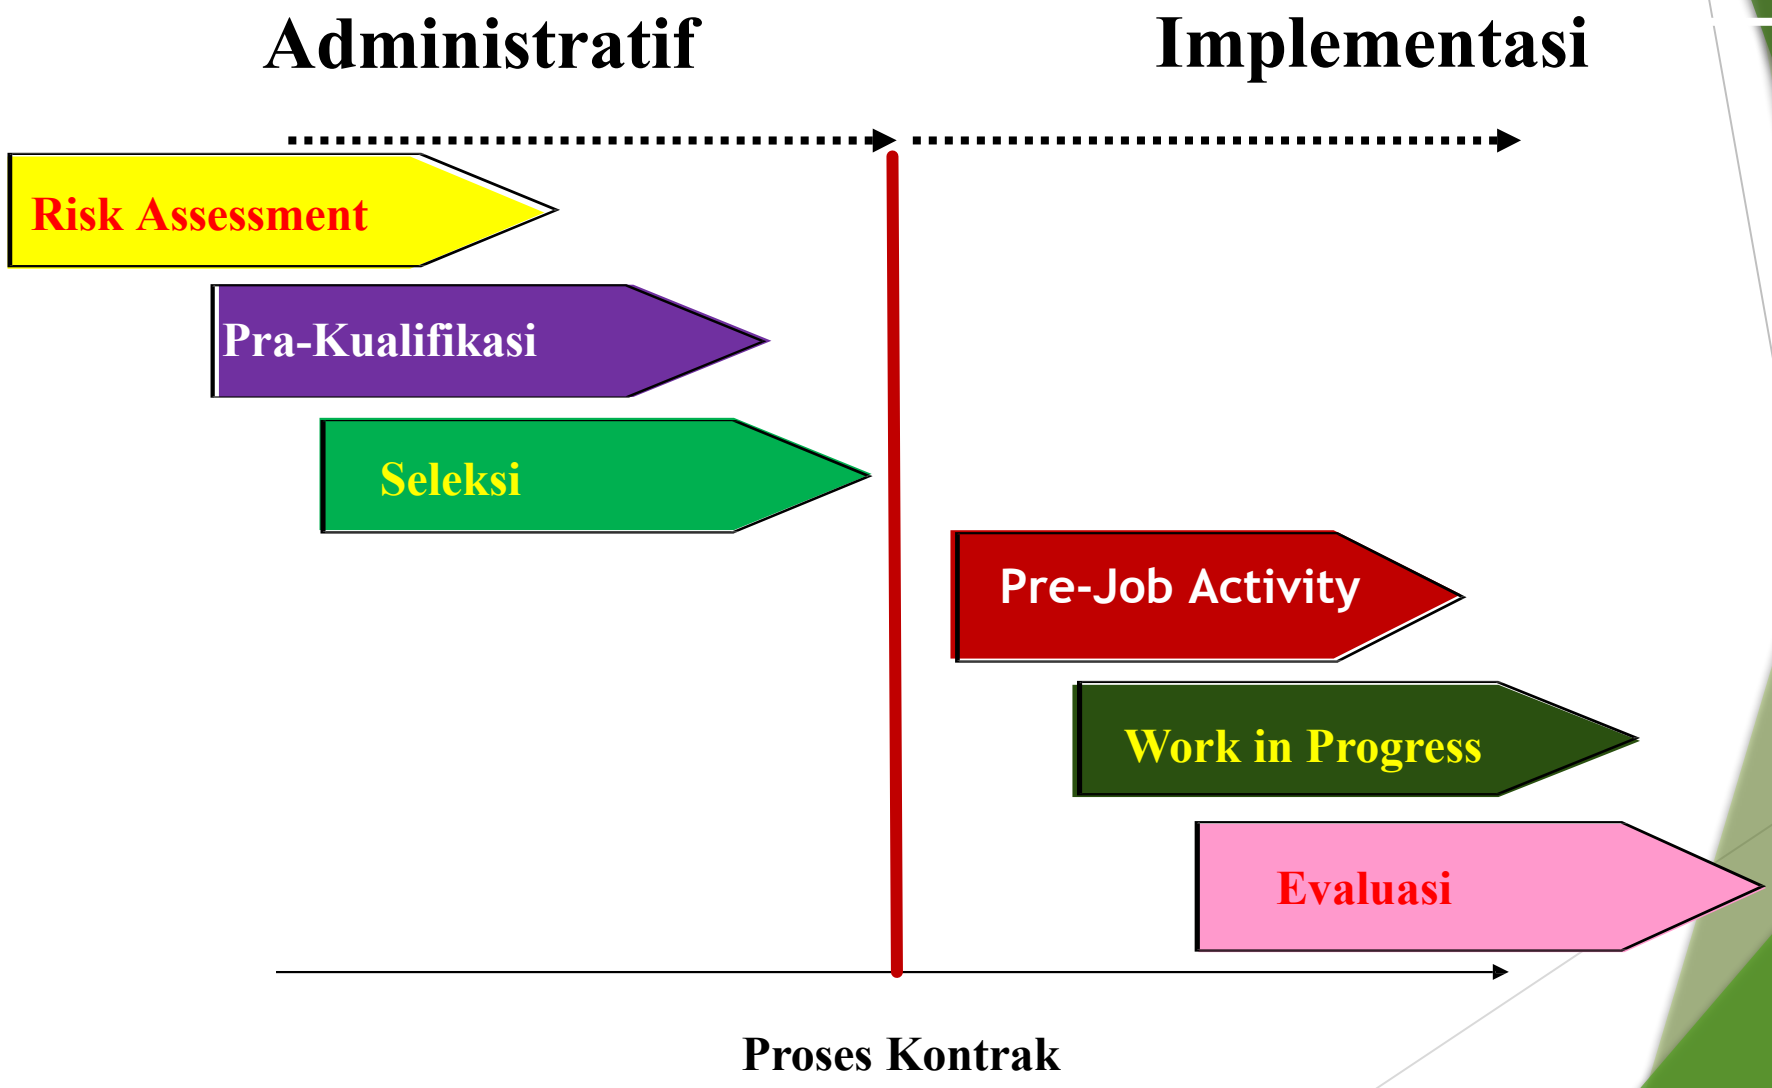

PROSES KONTRAK

Tahap Implementasi

4. Pre-Job Activity
5. Work In Progress/Pelaksanaan Pekerjaan
6. Final Evaluation/Evaluasi

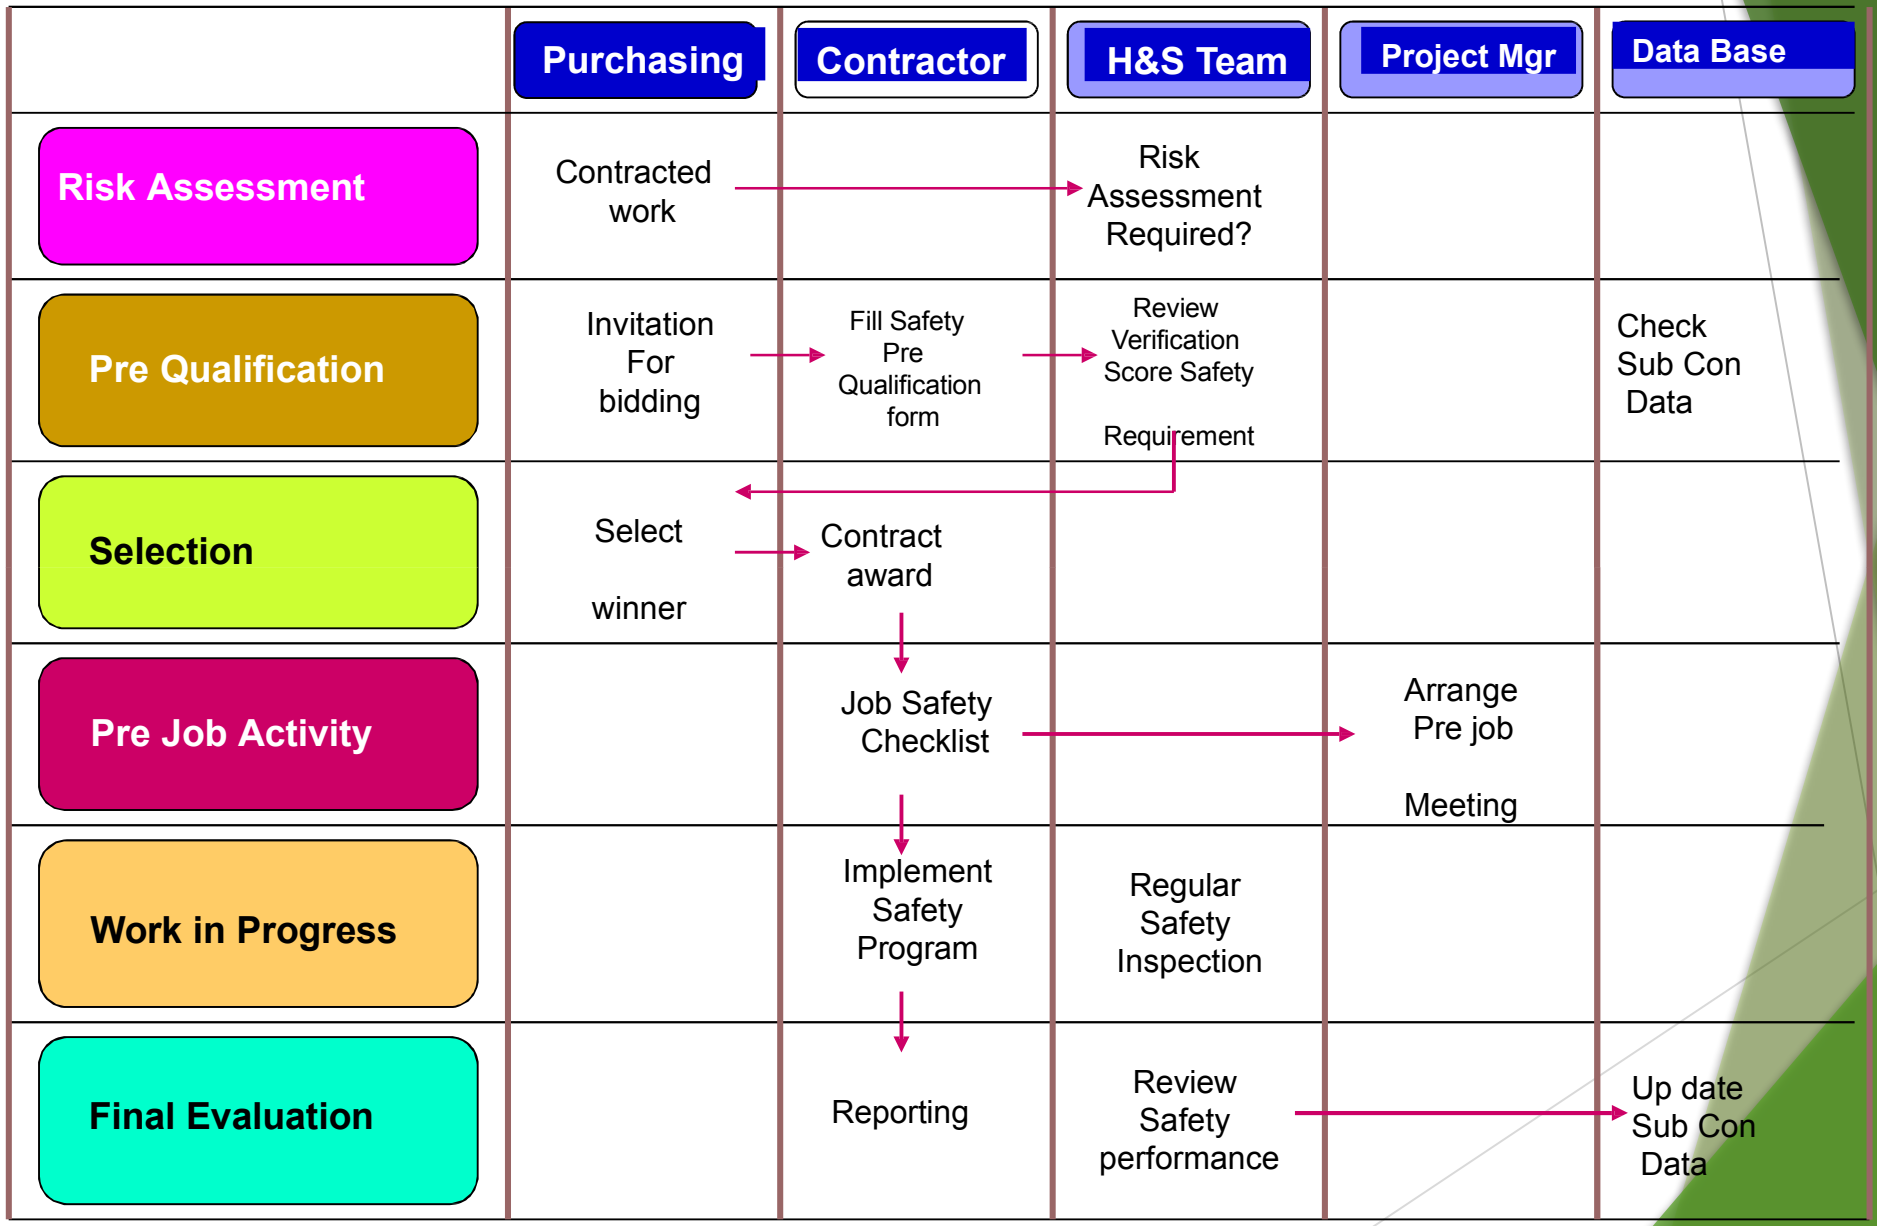

Tahapan CSMS

CSMS Introduction

- **Risk Assessment** – determine appropriate level of Company involvement
- **Pre-qualification** – qualify Contractors
- **Selection** – select Contractors
- ***Contract Award*** *– Signed contract with the selected Contractors*
- **Pre-job Planning Activities** – verify that Contractors are familiar with the facility, personnel, and relevant work to be performed
- **Work In Progress** – monitor Contractors while work is in progress
- **Final Evaluation and Close-out** – evaluate Contractor safety performance

1. Risk Assessment

Risk Assessment

- Project Planner/End User/Contract Holder/dll melakukan penilaian risiko atas project yang disiapkannya.
- Bertujuan untuk mengetahui tingkat resiko suatu pekerjaan yang akan diserahkan kepada kontraktor yang meliputi keselamatan manusia, peralatan/asset, lingkungan hidup dan citra perusahaan.
- Untuk menyesuaikan potensi bahaya dengan kemampuan kontraktor menjalankan pekerjaan dengan aman.
- Sebagai dasar menentukan krioteria kontraktor yang sesuai melaksanakan pekerjaan.

Penentuan Resiko

- Sifat Pekerjaan
- Lokasi Kerja
- Potensi bahaya di tempat kerja
- Potensi/kualifikasi kontraktor
- Pekerjaan simultan
- Lamanya pekerjaan
- Pengalaman dan keahlian kontraktor

Klasifikasi Resiko

- Resiko diukur dan diberi peringkat :
  - Rendah
  - Medium
  - Tinggi
- Klasifikasi Impak Resiko
  - Personnel Safety and Health Risks
  - Business Impacts

Klasifikasi Pekerjaan

- Pekerjaan kontraktor diklasifikasikan menurut tingkat risiko/bahaya.
- Contoh pengklasifikasian tingkat risiko :

1. Risiko Tinggi (H) Nilai Min 80
2. Risiko Sedang (M) Nilai Min 70
3. Risiko Rendah (L) Nilai Min 60

TUGAS DAN TANGGUNG JAWAB

ACTIVITIES	End User/SPA/Contract Holder	SCM	HSE Dept	Contractor/ Bidder	CHSEMS Champion in Each Dept	SCM Dept. Manager
1.Conduct Risk Assessment of the job/services required	R	I	C		A	I

RACI Roles: **R** = Responsibility, **A** = Accountability, **C** = Consult, **I** = Inform

Likelyhood (Kemungkinan Terjadi)

DESCRIPTOR	DESCRIPTION
1. Rare / Jarang Sekali	→ Terjadi hanya dalam keadaan-keadaan tertentu saja
2. Unlikely / Kecil Kemungkinan	→ Terjadi sekali-sekali saja
3. Possible / Mungkin Terjadi	→ Bisa terjadi sewaktu-waktu
4. Likely / Sangat Mungkin	→ Sangat mungkin terjadi dalam berbagai kondisi
5. Almost Certain / Hampir selalu terjadi	→ Hampir selalu terjadi setiap saat

Severity (Keparahan)

Keparahan (Severity)		
1	✓ Cedera/Penyakit Akibat Kerja (PAK) ringan atau ✓ Kerugian ringan < US$ 100	✓ Kerusakan Harta Benda ringan < US$ 100 ✓ Pencemaran Lingkungan ringan (*tumpah X<1liter)
2	✓ Cedera/PAK Hari Hilang tanpa Cacat Permanen atau ✓ Kerugian (US$ 100 < & < US$ 1 000)	✓ Kerusakan Harta Benda (US$ 100 < & < US$ 1 000) ✓ Pencemaran Lingkungan ringan (*tumpah 1<X<5liter)
3	✓ Cedera/PAK Hari Hilang dengan Cacat Permanen atau ✓ Kerugian (US$ 1 000 < & < US$ 5 000)	✓ Kerusakan Harta Benda (US$ 1 000 < & < US$ 5 000) ✓ Pencemaran Lingkungan ringan (*tumpah 5<X<20liter)
4	✓ Cedera/PAK berakibat Fatality pada Karyawan atau ✓ Kerugian (US$ 5 000 < & < US$ 10 000)	✓ Kerusakan Harta Benda (US$ 5 000 < & < US$ 10 000) ✓ Pencemaran Lingkungan ringan (*tumpah 20<X<50liter)
5	✓ Cedera/PAK berakibat Fatality pada Banyak Orang atau ✓ Kerugian Besar (> US$ 10 000)	✓ Kerusakan Harta Benda (> US$ 10 000) ✓ Pencemaran Lingkungan ringan (*tumpah X>50liter)

Risk Diagram – Severity vs Likelyhood

Severity / likelyhood	1 (Insignificant - Sangat Rendah)	2 (Minor - Rendah)	3 (Moderate - Sedang)	4 (Major - Besar)	5 (Catastrophic - Sangat Besar)
1 (Rare/Sangat Jarang)	Low	Low	Low	Low	Moderate
2 (Unlikely / Jarang)	Low	Low	Moderate	Moderate	High
3 (Moderate / Sedang)	Low	Moderate	Moderate	High	High
4 (Likely / Mungkin Terjadi)	Low	Moderate	High	High	Extreme
5 (Almost certain / Terjadi)	Moderate	High	High	Extreme	Extreme

Work Risk Matrix - Sample

TYPE OF WORKS	DETAIL WORKS	RISK LEVEL
Hot work	Welding, PWHT, hot tapping	H
	Cutting, grinding	M
Transportation	Heavy vehicle, passenger car	H
Civil works	Well-pad opening, land clearing, large building construction	H
	Trenching, digging, road maintenance, small building construction	M
Mechanical works	Turbine & Generator overhaul, mechanical construction, SAGS pipe works	H
	Maintenance works, equipment repair, equipment installation	M
Electrical & Instrumentation	Installation, commissioning, online repair	H
	Equipment & installation repair	H
Pressure vessel works		H
Testing, inspection & re-certification	NDT (radiation), hydro-test, gas test	H
	General technical inspection	M
Consulting, technical assistant, training		L
Medical services		M
Confined Space		H
Food catering and camp services		M
Office administration services	Office support and cleaning services	M
Site survey	Site survey at forestry area / green-field area	M
	Site survey at tea plantation area	M
Ground maintenance	Grass cutting, landscaping, gardening	M
Drilling		H

2. Pre Qualification

Pra Kualifikasi

- Untuk melakukan seleksi awal kontraktor yang memenuhi persyaratan K3 untuk melakukan pekerjaan.
- Mengevaluasi atas dasar daftar isian yang diserahkan kontraktor tentang persyaratan administratif, pengalaman dalam K3, organisasi K3, personnel K3 yang dimiliki, record K3 di proyek sebelumnya, Manual K3 yang dimiliki, serta referensi yang pernah diperoleh.
- Menjaring Kontraktor yang memiliki kesadaran, kemampuan dan kepedulian terhadap aspek K3LL/HSE agar dapat mengikuti proses tender.
- Semua Kontraktor yang di Pra Kualifikasi harus mampu mengidentifikasi risiko dari pekerjaan, mengatur, mengontrol dan mengendalikan semua aspe K3LL/HSE dalam pekerjaannya.

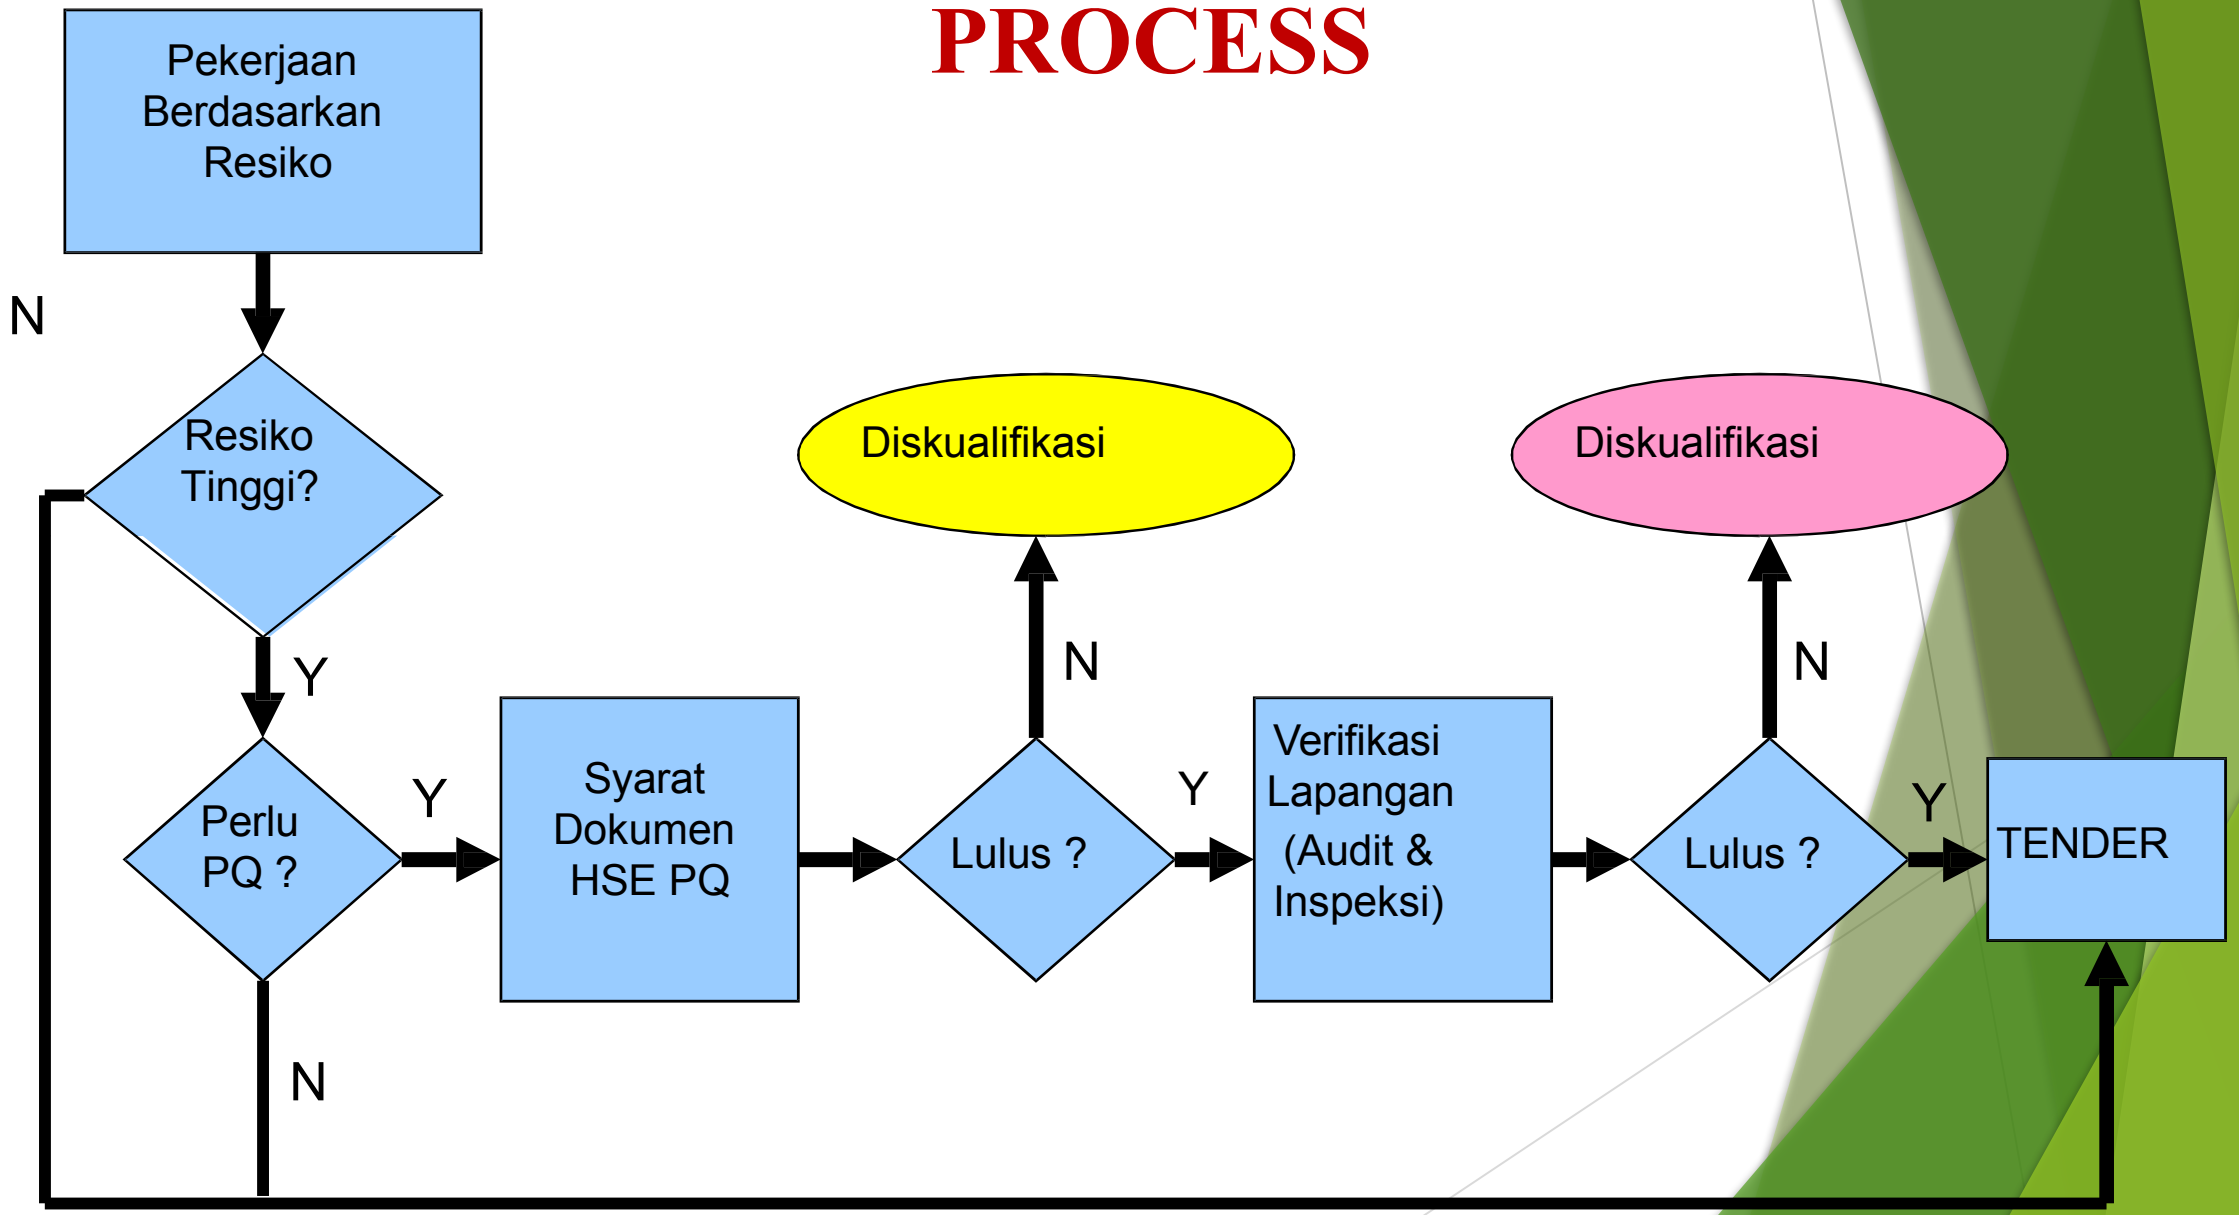

Pre-Qualification

- **Objective: to perform a review of a Contractor's financial viability and ability to perform the work safely, technically correct, commerciality and on time**
- **Method: Information concerning the Contractor's capabilities in HSE areas**
- **Key Points:**
  - **Identify scope of work & establish contract strategy**
  - **Identify bidders**
  - **Perform HSE assessment**
  - **Identify areas needing improving**
  - **Approve Contractor & make arrangements**

PRA KUALIFIKASI - RACI

ACTIVITIES	End User/Contract Holder	SCM	HSE Dept	Contractor/ Bidder	CHSEMS Champion in Each Dept	SCM Dept. Manager	GM
1.Send PQ CHSEMS Questionnaire to Contractor/Bidder.	I	R			I	A	
2.Return PQ CHSEMS Questionnaire with related evidence.		R		R	I	A	
3.Send Invitation to Contractor/Bidder for PQ CHSEMS Clarification.	I	R	I		I	A	
4. Attend PQ CHSEMS Clarification.	R	R	R	R	R	A	

PRE-QUALIFICATION PROCESS

Sistem Penilaian

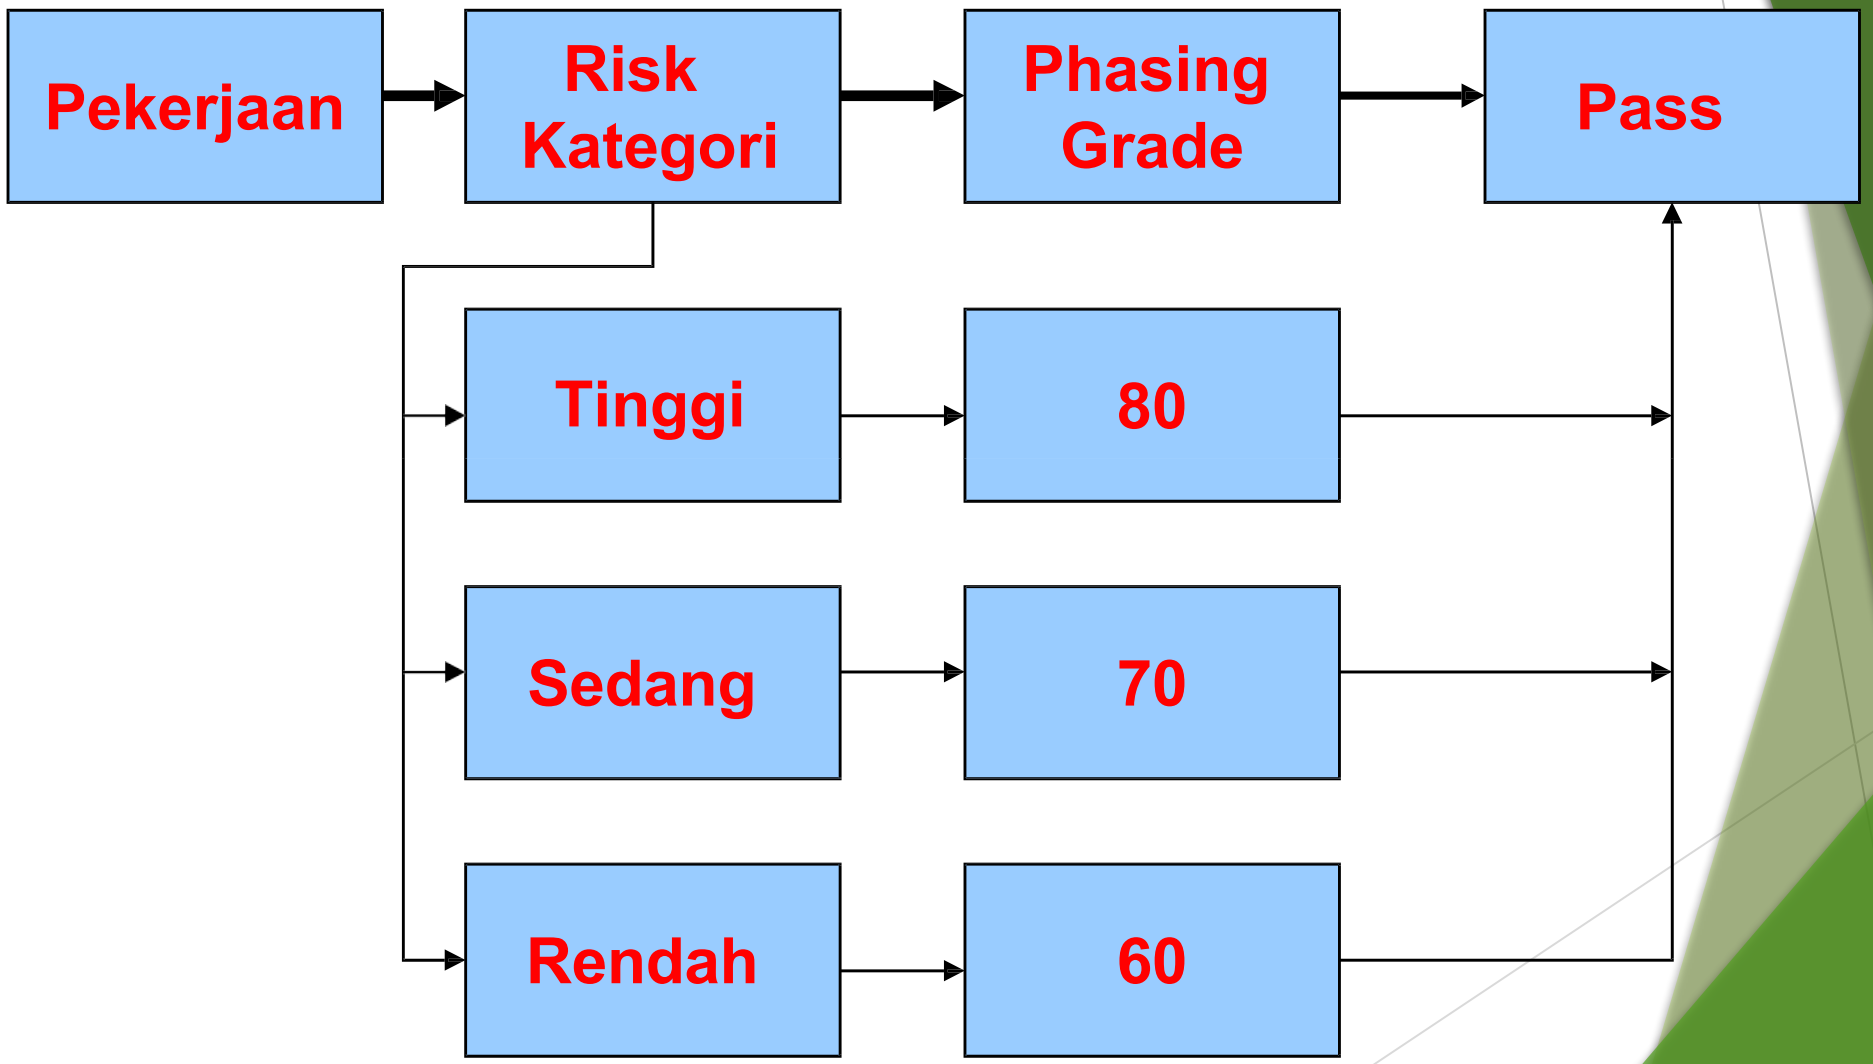

Sistem scoring berdasarkan elemen-elemen dalam questioner yang meliputi :

1. Policy Statement
2. Emergency Response Procedures
3. Basic Safety Rules (Safety Manual)
4. Accident Reporting Procedure
5. New Employee Orientation Program
6. Safety Meeting Program
7. Safety Training Program
8. Safety Inspection Program
9. Personal Protective Equipment (PPE)
10. Equipment & Materials Management
11. Professional Safety Support
12. Industrial Hygiene
13. Environmental
14. Statistical I & I Data
15. Incident Investigation
16. Sub-Contractors

Contoh Sistem Penilaian Kontraktor

	A	B	C	D	COMMENT
A. PRIMARY FACTORS					
Policy Statement	0	3	7	10	
Emergency Response Procedures	0	3	7	10	
Basic Safety Rules (Safety Manual)	0	3	7	10	
Accident Reporting Procedure	0	3	7	10	
New Employee Orientation Program	0	3	7	10	
Safety Meeting Program	0	3	7	10	
Safety Training Program	0	3	7	10	
Safety Inspection Program	0	3	7	10	
Personal Protective Equipment (PPE)	0	3	7	10	
Equipment & Materials Management	0	3	7	10	
Total Rating	-	+ -	+	- + -	**X 0.70 =**
		A		**Rating**	
B. SECONDARY FACTORS			C	D	COMMENT
Professional Safety Support	0	5	11	15	
Industrial Hygiene	0	6	14	20	
Environmental	0	6	14	20	
Statistical I & I Data	0	3	7	10	
Incident Investigation	0	5	11	15	
Sub-Contractors	0	6	14	20	
Total Rating	-	+ -	+	- + -	**X 0.30 = Rating**

CONDITIONAL ACCEPTANCE (CA)

Conditional Acceptance:

- **Diberlakukan bila hanya ada satu atau dua atau bahkan tidak ada kontraktor yang memenuhi kriteria K3LL/HSE (tidak lulus PQ CSMS) dalam proses tender.**
- **Kekurangan hasil dari PQ akan ditindaklanjuti oleh pihak kontraktor dan diberi tenggat waktu yang disepakati antara *End User* dan Kontraktor.**
- **Conditional acceptance harus mendapat persetujuan dari Assigned Approval Person (seperti Line Manager, HSE Manager, SCM Manager dan General Manager dll).**

3. Selection

Selection

- **Objective:** to choose the Contractor that is most likely to perform the work safely, economically, technically correct with minimum company supervision, and in a timely manner.
- **Method:** Communicate information of HSE requirement and risk associated to Contractor in the bid documents and pre-bid meetings.

- **Key Points:**
  - **Distribute proposal**
  - **Contractor submits bid**
  - **Review bid**
  - **Award Contract**

Selection

The Selected Contractor Should be Best :

- **HSE**
- **Technical**
- **Commercial**

Selection

Kotraktor menyiapkan penawaran berikut HSE Program selama kontrak (Dokument HSE).

Perusahaan mengevaluasi penawaran dan melakukan klarifikasi.

Document HSE :

- ✓ HSE General Requirements
- ✓ HSE Plan
- ✓ HSE Control Procedures and Compliance
- ✓ Responsibilities, authorities, and controlling between Client and Contractors (e.g. ERP)
- ✓ Training Need and Competence of Contractor
- ✓ Etc
- ✓

Selection - RACI

ACTIVITIES	End User/Contract Holder	SCM	HSE Dept	Contractor/ Bidder	CSMS Champion in Each Dept	SCM Dept. Manager
1.Bid opening and evaluation	R	R	C	I	I	A
2.Determine if Site Visit required	R	C	C	I	A	I

CONTOH KRITERIA UMUM – PENILAIAN HSE

EVALUATION CRITERIA ON HSE PLAN PROCEDURE PER SECTION/SUBSECTION/POINT			
A Not Meet the Minimum Expectation	B Below Minimum Expectation	C Meet the Minimum Expectation	D Exceed Minimum Expectation
No evidence as per request by minimum expectation in the section/subsection/point	Provide evidence, however only in general, no detail evidence as required by minimum expectation in the section/subsection/point	Provide evidence in detail for the project as required by the minimum expectation in the section/subsection/point	Provide a comprehensive evidence for the project beyond the minimum expectation in the section/subsection/point

Item	Description	Min Score (of max 100)	Weight Factor
1	Technical Aspect	70	90%
2	HSE Plan as exhibit H required and Site Visit (if required)	70	10%
	Total		100%

CONTOH KRITERIA UMUM – PENILAIAN HSE

	A	B	C	D
19.BASIC SAFETY RULES (SAFETY MANUAL)	No written Safety manual .	Safety rules have been developed in written form.	Safety rules are incorporated in Safety Manual, but not in a format which is distributed to employees.	Safety rules exist in handbook form, distributed to employees. Disciplinary action procedures established for infraction of rules.
20.ACCIDENT REPORTING	No written Accident Reporting Procedures.	Written procedures requiring basic reporting of personal injuries only.	Written procedures requiring reports on all accidents and incidents.	Procedures require accident reports to be provided to Operator's representative. Supervisor investigation required to determine and correct root causes.
21.NEW EMPLOYEE ORIENTATION PROGRAM	No formal program.	Verbal instructions on Company procedures only.	Orientation booklet provided for new employee, but no on- the-job orientation by the supervisor. Language barriers are recognised.	Employee handbook provided and supervisor outlines, explains and demonstrates new employee's job. Follow- up observation of the new employee at work is included. Employee has had safe practices and emergency duties explained. Multi-lingual program.

CONTOH KRITERIA UMUM – PENILAIAN HSE PLAN

	A	B	C	D
22.SAFETY MEETING PROGRAM	No formal program.	Periodic safety meetings for special operations only.	Safety meetings performed on a regularly scheduled basis by the supervisor or safety representative.	In addition to "B" employees are assigned topics to discuss on a rotational basis.
23.SAFETY TRAINING PROGRAM	No safety training established.	On-site basic safety training conducted occasionally.	Safety training is given for specialised operations, but no routine training conducted.	Formal safety training programs have been developed and are conducted on a regular basis. Retraining periods are
24.SAFETY INSPECTION PROGRAM	No inspection program	Plan relies on outside sources, i.e. insurance company inspections. No supervisory inspection of work place.	Awritten program outlining inspection guidelines, responsibilities, frequency and follow- up is in effect.	In addition to "B", periodic inspections are conducted by top management or by teams of specialists.

CONTOH KRITERIA UMUM – PENILAIAN HSE PLAN

	A	B	C	D
25. PROFESSIONAL SAFETY SUPPORT	None on staff. No assignment to any specific person.	Safety is assigned to a specific person on location.	Safety professional on staff. Not routinely involved in operations	Safety professional on staff who routinely inspects operations monitors compliance and findings communicates
26. INDUSTRIAL HYGIENE	No Industrial Hygiene policy exists.	Basic policy exists but is not enforced.	Apolicy exists and recognizes hazards but is followed up.	Apolicy exists which manages operations to minimize human health impacts workplace free of Recognized health
27. PERSONAL PROTECTIVE EQUIPMENT	No personal protective equipment.	Provides minimum personal protective equipment.	Provides equipment but lacks training and follow-up.	Contractor furnishes all safety equipment, training and clothing necessary for the protection of it personnel

CONTOH KRITERIA UMUM – PENILAIAN HSE

	A	B	C	D
27. PERSONAL PROTECTIVE EQUIPMENT	No personal protective equipment.	Provides minimum personal protective equipment.	Provides equipment but lacks training and follow-up.	Contractor furnishes all safety equipment, training and clothing necessary for the protection of it personnel
28. ENVIRONMENTAL	No environmental policy	Apolicy exists.	Apolicy exists which complies with regulations.	Apolicy which exceeds local regulations and complies with PSC expectations.
29. EQUIPMENT AND MATERIALS MANAGEMENT	No program exists for regular inspection and preventative maintenance.	Basic program exists, but not applied and no record keeping.	Programexists but not regularly applied and limited record keeping.	Aregular program exists for inspection, preventative maintenance, operation, acquisition and certifications. Good record

CONTOH KRITERIA UMUM – PENILAIAN HSE PLAN

	A	B	C	D
30. STATISTICAL INCIDENT AND INJURY DATA	No statistical and injury data exists.	Lacks statistical data. Trends are increasing or rate is significantly above the industry norm.	Minimumstatistical data. Average performance compared to industry	Has historical data for past three years. Trends are decreasing and relative position in industry is hig
31. INCIDENT INVESTIGATION	No procedures or process established to investigate incidents. Near-misses not recognized.	Basic procedures exist but there is no followup.	Has procedures but is deficient in several areas that can be corrected through changes in existing programs.	Recognizesand records actual near- miss incidents. Investigates incidents to root causes throughestablished procedures. Systemexists to track all close out findings
32. SUB-CONTRACTORS	No evidence that sub- contractor's EHS performance is considered.	Sub-contractor's EHS performance is irregularly reviewed. No record keeping.	Evidence that the sub- contractor's safety performance is taken into account in the selection process. Some statistical tracking of sub-contractor safety performance.	
33. OTHER

(nama perusahaan)

UNTUK

MELAKSANAKAN PEKERJAAN JASA PEMBORONGAN

.....
.....

(nama pekerjaan yang akan dilaksanakan)

Surat Perjanjian ini dibuat di ..... pada hari ..... tanggal ..... bulan .....tahun ..... *(tempat, tanggal, bulan dan tahun penandatanganan Surat Perjanjian)* antara .....*(Nama Kepala Kantor/Satuan Kerja/Pemimpin Proyek/Bagian Proyek)*, selanjutnya disebut **PIHAK KESATU**, dan .....
(nama pemimpin perusahaan yang mengikat perjanjian), selanjutnya disebut **PIHAK KEDUA**,
termasuk semua lampiran yang merupakan satu kesatuan yang tidak terpisahkan yang selanjutnya disebut **KONTRAK** tertanggal.....200..

MAKA DENGAN INI Kedua Belah Pihak menyetujui semua ketentuan yang tercantum dalam pasal-pasal berikut:

1. Kata-kata dan ungkapan-ungkapan dalam surat perjanjian ini mempunyai arti yang sama sebagaimana yang dituangkan di dalam syarat-syarat surat perjanjian di bawah ini.

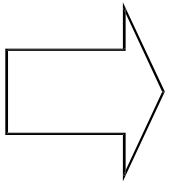

5. Pre Job Activities

Pre-Job Planning Activities

Company:
- Review HSE Plan
- Monitor pre-execution status
- Supervise, inspect, audit

Contractor:
- HSE Plan

All:
- Commence (or continue) induction & training
- Attend progress meeting

CONTRACT AWARD

HOLD KICK-OFF MEETING

MOBILIZE TO WORK LOCATION

PRE-EXECUTION HSE REVIEW

PROCEED TO EXECUTION

Pre Job Activities

- Dilaksanakan setelah pemenang/pelaksana pekerjaan ditetapkan.
- Dilaksanakan kegiatan awal sebagai persiapan sebelum pekerjaan dijalankan meliputi antara lain :
  - Pertemuan pendahuluan membahas rencana kerja.
  - Menentukan strategi pelaksanaan pekerjaan
  - Menentukan persyaratan perijinan yang diperlukan
  - Menentukan persyaratan tenaga kerja yang diperlukan.
  - Menentukan sistem pengawasan selama pekerjaan berlangsung.
- Memberikan kesempatan kepada kontraktor untuk mengenal dan familiar dengan lokasi dan aktivitas yang akan dikerjakan serta kondisi setempat serta interaksi selama pekerjaan berlangsung.
- Memastikan aspek-aspek telah di komunikasikan, dipahami dan siap dilaksanakan oleh semua pihak sebelum pekerjaan dimulai.
- Meyakinkan bahwa Kontraktor sudah memahami risiko, mempersiapkan rencana mitigasi dan program K3LL/HSE yang akan dilaksanakan terhadap pekerjaan yang diterimanya.
- Memastikan kesiapan Kontraktor dalam melaksanakan HSE Plan yang telah disepakati.

Pre Job Activities – AUDIT SAMPLE

No.	SUBJECT	YES	NO	N/A	SCORE	REMARKS
I. WORK PLAN						
1.1	Has the HSE matter been included in the work program or procedures and discussed together with the contractor?					
1.3	Have all the Contractor's equipment to be used has been inspected and passed?					
1.8	The Contractor's expert personnel as the HSE Representative					
1.9.2	Induction for all personnel?					

HSE Plan yang disetujui

Sertifikat dan kelayakan peralatan yang dipakai

- *Kualifikasi HSE Rep*
- *Lulus HSE Comp Test*

HSE Induction

Pre Job Activities – AUDIT SAMPLE

2.2	Does the Contractor have system to prevent accidents due to the following					
	matters and method to monitor the performance thereof?					
	2.2.1 Working environment cleanly-ness?					
	2.2.2 Machine Safe Guarded?					
	2.2.3 Chemicals?					
	2.2.4 Inflammable and explosive materials?					
	2.2.5 Radioactive materials?					
	2.2.6 Garbage Disposal?					
	2.2.7 Maintenance of equipment, machine protector, tools and others?					
	2.8 Work Licensing System?					
	2.9 Personal Protection Equipment?					
	2.10 Others _____?					

Kontrol dari bahaya-bahaya yang diidentifikasi pada Risk Assessment

Pre Job Activities – AUDIT SAMPLE

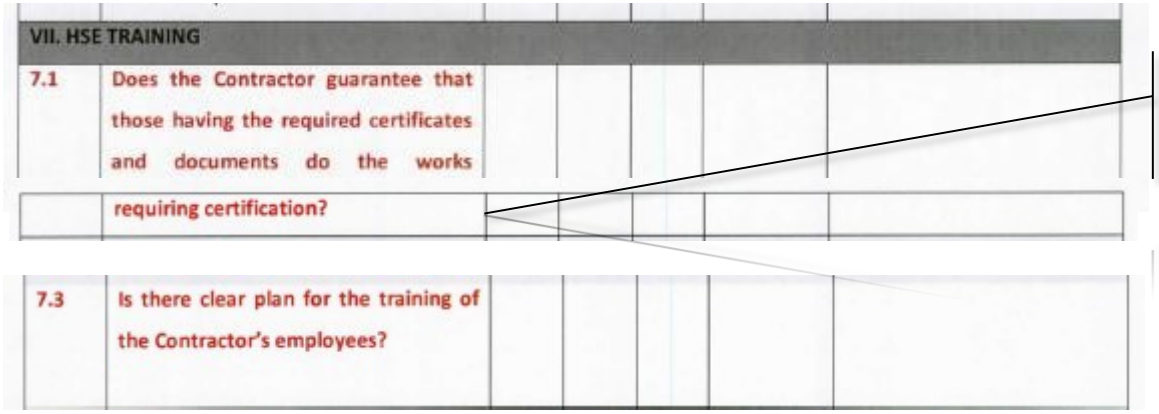

III. EMERGENCY RESPONSE PLANS AND PROCEDURES						
3.1	Do the Contractor's employees understand their roles in emergency condition?					
3.2	Do they know how to report in the event of emergency condition?					
3.8	Does the Contractor have personnel that can be contacted in emergency condition?					

- *Emergency Response Plan dan Prosedur*
- *Sosialisasi ERP*
- *Emergency Contact List*

IV. PRE-JOB SAFETY MEETING						
4.1	Has pre-job Safety meeting been					
	scheduled prior to the commencement of the works?					
4.2	Does competent contractor representative attend the meeting?					

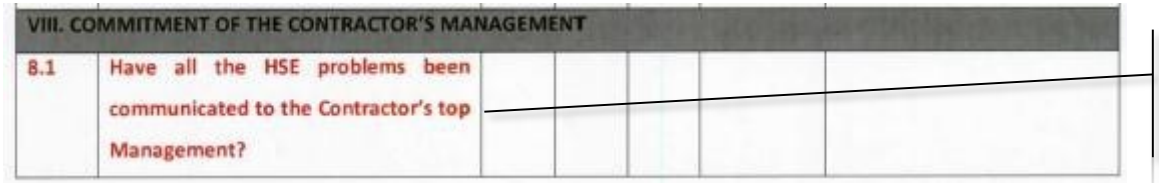

PJA Meeting

Pre Job Activities – AUDIT SAMPLE

VII. HSE TRAINING						
7.1	Does the Contractor guarantee that those having the required certificates and documents do the works requiring certification?					
7.3	Is there clear plan for the training of the Contractor's employees?					

- *Training dari Personil Kontraktor*
- *Training Plan*

VIII. COMMITMENT OF THE CONTRACTOR'S MANAGEMENT						
8.1	Have all the HSE problems been communicated to the Contractor's top Management?					

Tandatangan Komitmen HSE

6. Work in Progress

Pelaksanaan Pekerjaan

- Program K3 diimplementasikan pada saat kegiatan kerja berlangsung.
- Kontraktor melakukan upaya pencegahan kecelakaan dalam setiap langkah kegiatannya sesuai dengan sifat dan jenis bahaya yang ada.
- Program K3 yang dijalankan disesuaikan dengan skala pekerjaan, tingkat resiko dan jumlah tenaga kerja yang dipekerjakan.
  - Key Points:
    - HSE performance report
    - Inspection
    - Incident reporting
    - Emergency drills.

WORK IN PROGRESS

- Melakukan penilaian terhadap kinerja Kontraktor selama pelaksanaan pekerjaan HSE dan memberikan *feedback*.
- Memastikan tidak ada potensi bahaya yang terlewatkan dan melakukan intervensi bila ditemukan.
- Melakukan kontrol terhadap implementasi HSE selama pelaksanaan pekerjaan dan memastikan bahwa pelaksanaan pekerjaan telah sesuai dengan kesepakatan HSE Plan sebelumnya.
- Salah satu cara untuk memperkecil implementasi "Gap" yang merupakan bagian dari pelaksanaaan HSE Plan.

WORK IN PROGRESS - RACI

ACTIVITIES	End User/SPA/Contract Holder	SCM	HSES Dept	Contractor	CHSEMS Champion in Each Dept	SCM Dept. Manager
1. Determine WIP Schedule	R		C	I	A	
2. Initiate Opening Meeting	R		C	R	A	
3. Conduct HSE Inspection Audit	R		C	R	A	

WORK IN PROGRESS – FORM SAMPLE

Data Interim KPI Kontraktor:

- **Leading dan Lagging Indicator.**

Occupational Safety Performance Program	Occupational Safety Performance Monitoring	**Contractor Representative :**
1. Number of Near Miss: _____	1. Number of Near Miss: _____	_____ Name/Position
2. Number of Environmental Case: _____	2. Number of Environmental Case: _____	_____ Sign/Date
3. Number of First Aid Case : _____	3. Number of First Aid Case : _____	**PHEWMOContractor Representative :**
4. Number of Loss of Production : _____	4. Number of Loss of Production: _____	_____ Name/Position
5. Number of Medical Treatment: _____	5. Number of Medical Treatment: _____	_____ Sign/Date
6. Hydrocarbon Release: _____	6. Hydrocarbon Release: _____	
7. LTI _____	7. LTI _____

NC- FORM SAMPLE

Untuk memonitor penyelesaian rekomendasi pada WIP, rekomendasi agar dituliskan dalam NC Form

Appendix 15. Non Conformity Monitoring (PJA-WIP)

PHEWMO/HSES/SFTY/J/STK/2014/A04-F11

No	Phase (PJA/WIP)	Description of Non Conformity	Corrective and Preventive Action Program	Deadline	PIC	Status (Close/Open)	Close Date	Evidance

Waktu penyelesaian rekomendasi disepakati pada saat closing meeting WIP

PETUNJUK PENILAIAN WIP

This Table is used to guide user evaluate the WIP process using Appendix 11. HSE Inspection Checklist (Job Execution Phase/ Work In Progress) and Appendix 12. HSE Program Checklist (Work In Progress)

Score	Justification
1	Meet 10% or below of all requirement in subsection
2	Meet 11% - 29% of all requirement in subsection
3	Meet 30% - 39% of all requirement in subsection
4	Meet 40% - 49% of all requirement in subsection
5	Meet 50% - 59% of all requirement in subsection
6	Meet 60% - 69% of all requirement in subsection
7	Meet 70% - 79% of all requirement in subsection
8	Meet 80% - 89% of all requirement in subsection
9	Meet 90% - 99% of all requirement in subsection
10	Meet all point/subsection

7. Final Evaluation

Evaluasi

- Hasil CSMS harus dievaluasi secara berkala , khususnya setelah suatu pekerjaan kontrak selesai.
- Hasil evaluasi digunakan untuk menilai kinerja kontraktor.
- Sebagai masukan untuk meningkatkan program CSMS dalam perusahaan.
- Dibentuk tim evaluasi yang melibatkan semua unsur terkait dalam perusahaan.

- **Key Points:**
  - **HSE close-out report & final evaluation**
  - **Feedback**

FINAL EVALUATION - RACI

ACTIVITIES	End User/SPA/Contract Holder	SCM	HSES Dept	Contractor/	CHSEMS Champion in Each Dept	SCM Dept. Manager
1.Determine FE Schedule	R		C	I	A	
2.Initiate Opening Meeting	R		C	R	A	

PENILAIAN FINAL EVALUATION SAMPLE

Evaluation Score	Below Target	On Target	Exceeding Target
>80 – 100			
>60 – 80			
≥ 50 – 60			
< 50			

Hasil Final Evaluation akan menentukan tahapan PQ untuk kontrak selanjutnya.

Recomendation:

1. Excellent Vendor (Green):
   - Award to certificate **Excellent Contractor**
   - Direct passed to selection phase on next tender
   - Extension of PQ certificate active period up to 2 (two) years
2. Met Expectation Vendor (Orange):
   - Award to certificate **Good Contractor**
   - Have to follow PQ phase on next tender
3. Below Expectation Vendor (Yellow):
   - Award to certificate **Adequate Contractor**
   - Must pass management approval/specific requirements
4. Red Vendor (Red):
   - **1 (one) year blacklist** to follow any tender
   - When contractor wants to get back it has to be improve and verified
